

DEMONEYE-X

FEARSOME UNKNOWN CREATURES CLOSE IN.
NOW, A NEW TERROR SPREADS OUT ACROSS THE UNIVERSE !!

irem

DEMONEYE-X

a new game is born.
CAN YOU BEAR THE TERROR?

HOW TO PLAY

- The player moves his spaceship to the right and left with the control lever and fires missiles by pressing the fire button.
- When the space demons are attacked they change their shapes and fire missiles. The player must avoid their attacks and retaliate with his own missiles.
- When all the small demons have been shot down and the super-demon is hit in the heart, the screen is cleared.

HINTS ON WINNING

The small demons change their shapes three times.

The first demon shape (Demoneye-y) turns into the second (Octoplus) and the second into the third (Octobomb) when they are shot. Care must be taken to prevent Octobombs from hitting the spaceship.

Bonus chances for 3-demon formation!

Sometimes Demoneye-y and Octoplus change their color. If Octoplus are shot while their color is changing they will turn into a

group of three Octobombs. If all these three demons are killed a bonus point is scored.

Act at the heart of the super-demon!

When all the small demons have been wiped out, a hole appears beneath the body of the super-demon (Demoneye-X). This is the super-demon's weak point. If the player can shoot the super-demon in the heart he can destroy the creature.

3-eyed demon king appears.

If the player succeeds in a series of two games, a three-eyed demon king appears. To destroy it, the player must hit its heart 3 times with his missiles.
